

E&M TECHNOLOGIES, INC.

854 Woodmoor Acres Dr.
Monument, CO 80132

Job Title: Cyber Analyst - Principal

Location: Ft Meade, MD

Security Clearance: TS/SCI

E&M Technologies is currently seeking a **Cyber Analyst – Principal** to join our team at Ft. Meade, MD in support of the Army INSCOM 902nd Program.

Responsibilities:

- Provides intelligence support for contingency operations, battle staff and operational-level planning, joint and multi-lateral training exercises, and strategic engagement policy throughout the Areas of Operational Responsibility (AOR) and Areas of Interest (AOI).
- Monitors and analyzes all strategic and operational aspects of political, military, and economic developments for the countries in the AORs and AOIs.
- Analyst assesses future and on-going political-military developments, military capabilities and doctrine, weapons acquisitions, and employment of military forces within each country. Researches, authors, and coordinates threat assessments to support the Commander and the senior leadership as well.
- May function as a team lead or as an individual contributor.
- Use SIGINT, HUMINT, IMINT, Geospatial Intelligence (GEOINT), and OSINT databases to research and analyze raw reporting to assess foreign cyber collection threats to U.S. Army, DoD, and Intelligence Community (IC) interests worldwide.
- Convert raw reporting into finished documentation; including integrating, evaluating, analyzing, and converting all available data, into finished intelligence products.
- Produce analytical products that address foreign cyber threat topics of Strategic (enduring cyber threat), Current (recent ongoing cyber threat), and Anticipatory (emerging cyber threat) importance to the U.S. Army, DoD, and IC.
- Analyze foreign cyber threats applicable to assigned areas of responsibility — producing finished intelligence that includes assessments of events and judgments regarding the implications of the information for the U.S. Army, DoD, and IC.
- Answer production requirements and Requests for Information; identify intelligence gaps and write consumer evaluations of raw reporting; and prepare and present briefings related to assigned areas of responsibility.
- Analyst must be able to write and produce finished intelligence products for released to the Intelligence Community.

Position Requirements:

- Analysts must have 8 years of experience as a cyber analyst along with familiarity of information systems and networking.
- Analysts shall be familiar with the requirements of AR 381-12 (Threat Awareness and Reporting Program); AR 381-20 (US Army Counterintelligence); AR 381-10 (US Intelligence); and DODI 5240.23 (CI Activities in Cyberspace) and shall apply the principles and requirements of these regulations in any contractor- provided analytical support.
- Completion of one or more of the following courses is a plus: (1) Defense Cyber Investigations Training Academy (DCITA) Introduction to Networks and Computer Hardware (INCH); (2) Joint Military
