

E&M Technologies
4465 Northpark Drive, Suite 304
Colorado Springs, CO 80907

POSITION: Solaris Systems Administrator/Engineer

Work Location: Colorado Springs, CO

Required Clearance: Secret

E&M Technologies, Inc is seeking a Systems Administrator/Systems Engineer. E&M Technologies offers competitive salaries, medical benefits, and 401k plan.

Position Requirements:

- Primary responsibilities are participating in the implementation, maintenance, and support of information technologies, to include Solaris (primarily), Red Hat Linux, and Windows systems and components.
- The engineer schedules and performs installations and upgrades to OS/COTs, software, and database packages in accordance with established IT policies and procedures.
- In addition, this position will support the overall integration on new development systems as they transition to sustainment.
- The engineer is responsible for managing appropriate software solutions to ensure server data integrity, monitoring and tuning the system to achieve optimum performance level, monitoring security alerts and application systems, and working with other staff to ensure that all appropriate patches are applied.
- The engineer will develop scripts using Z-Shell, C-Shell, Perl, or other similar tools to improve administration automation.
- The selected candidate will also develop and apply cybersecurity solutions utilizing current DISA Security Technical Implementation Guides (STIGs) to ensure high compliance status is met.

Required Experience:

- Experience with Windows Systems Administration (Active Directory, GPO).
- Experience with Solaris Administration (Account Management, Kerberos).
- Experience with TCP/IP Network Settings.
- Troubleshoot Windows 10 desktop issues (COTS issues, peripherals, printers).
- Manage group shares, home directories including shares and security permissions (NTFS, File Shares).
- Ensure compliance with computer security policy, Risk Management Framework (RMF).
- Monitor computer system usage (Network links, Virtual Environment).
- Audit log gathering for ISSO review identifying specific events (SolarWinds, Splunk, HBSS, ACAS).
