

E&M Technologies
4465 Northpark Drive, Suite 304
Colorado Springs, CO 80907

POSITION: Software Systems Engineer

Work Location: Sunnyvale, CA

Required Clearance: Secret

Shiftwork: Occasional

E&M Technologies, Inc. is currently seeking a **Software Systems Engineer** to support a Federal government client.

Position Requirements:

- Performs technical planning, system integration, verification and validation, cost and risk, and supportability and effectiveness analyses for total systems.
- Analyses are performed at all levels of total system product to include: concept, design, fabrication, test, installation, operation, maintenance and disposal.
- Ensures the logical and systematic conversion of customer or product requirements into total systems solutions that acknowledge technical, schedule, and cost constraints.
- Performs functional analysis, timeline analysis, detail trade studies, requirements allocation and interface definition studies to translate customer requirements into hardware and software specifications. For positions that perform IT responsibilities, use E646, Systems Engr-IT.

Required Experience:

- Experience with Java/C/Python/Perl
- Experience with Systems engineering
- Experience with Software Testing
- Experience and ability to perform requirements analysis and script development
- Good computer and programming skills to develop maintainable code, perform unit testing, integration & regression testing.

Desired Skills:

- Testing experience in Lab environment preferred.
- Anomaly detection and resolution software experience would be a plus.
- Experience with web applications and satellite ground systems.
- Hardware/software integration.
- Familiarity with spacecraft subsystems, hardware, telemetry, command & control.
- Experience developing ground application software.
- L3, Java, Perl, Python, Clearcase or equivalent SW CM Tool, IBM Rational ClearQuest or equivalent.
- Strong communication and interpersonal skills.
