Job Title: RMF Analyst Manager
Location: Colorado Springs, CO
Security Clearance: Secret with ability to obtain Top Secret

E&M Technologies is currently seeking an **RMF Analyst Manager** to support a program that provides sustainment, maintenance, problem and change management services to help ensure secure, reliable, and uninterrupted availability of the Department of Defense IP networks. The RMF Analyst will implement and support Leidos RAPMAP for creating and maintaining artifacts required to demonstrate compliance and achieve their goal. This position will report directly to the RMF Lead, with regular interaction with the Cyber Security Manager and government POCs.

Responsibilities:
- Communicate clearly and succinctly both written and orally, and present products and ideas in a business-like manner.
- Work in dynamic fast paced environments that require team interaction and coordination of efforts.
- Provide management support to the RMF for NIPR/SIPR & Coalition networks under the purview of the Command.
- Manage and maintain the RMF assessment and Authorization program.
- Develop, update, organize, maintain, and track RMF documentation using information obtained from the customer.
- Prepare test plans.
- Provide assessment and authorization (A&A) support in the development of security and contingency plans and conduct complex risk and vulnerability assessments.
- Analyze policies and procedures against DoD security policies and regulations and provide recommendations for closing gaps.
- Develop and complete system security plans and contingency plans.
- Recommend system enhancements to improve security deficiencies.
- Interface with both client managers and system users.
- Provide remote support and/or travel to customer sites as required.
- Perform other duties as assigned.

Basic Qualifications:
- DOD 8570 IAM I, must include Security+ or equivalent.
- RMF Certification or equivalent.
- Expert level experience with DoD IT security requirements.
- Expert level experience in Certification and Accreditation (C&A) process and development of Risk Management Framework (RMF) certification packages.

Preferred Qualifications:
- ITIL v3 – Foundation.
- DOD 8570 IAM II.
- Certified Ethical Hacker (CEH).
- Microsoft Certified Solutions Associate (MCSA).

- Cisco Certified Network Associate (CCNA).
- Experience in network access control, intrusion prevention and detection systems, firewalls, routers, incident response, information security methods, and risk management.
- Working knowledge of supporting Operating Systems: Windows Server 2008-2016 and Windows 10, VMWare vSphere, Solaris 10-11, Red Hat Enterprise Linux.
- Adaptable to changing circumstances and operational needs.
- Understanding of Department of Defense Military standards.

Required Education/Experience:
- Bachelors degree with 4+ years of related experience, additional years of related experience accepted in lieu of a degree.

E&M Technologies offers competitive salaries, medical benefits, and a 401k plan.

To Apply for this Position:
You must have the listed skills and experience in your resume to be selected for an interview. Send your resume to emtech@eandmtech.com

All qualified applicants will receive consideration for employment without regard to race, color, religion, sex, sexual orientation, gender identity, marital status, national origin, age, veteran status, disability, or any other protected class. U.S. Citizenship is required.
