Job Title: Senior VDI Systems Engineer
Location: Springfield, VA
Security Clearance: Secret
Travel: Yes, 10% of the time

E&M Technologies is seeking qualified candidates for a **Senior VDI Systems Engineer** to support the development and deployment of a global Citrix-based VDI solution within the DISA Joint Regional Security Stack (JRSS). JRSS is a multi-year, global effort to improve the DoD's security posture and provide enhanced security capabilities and analytics by centralizing and virtualizing network security into regional stacks rather than locally distributed appliances.

As the Senior VDI Engineer, you are responsible for developing, documenting, deploying, and refining the JRSS global VDI system, which includes cross domain and secure file transfer solutions.

Responsibilities:
- Architect and develop solutions in the lab to enhance the security posture, provide additional capability, and improve performance of the JRSS virtual infrastructure.
- Providing application installation and troubleshooting of Citrix XenDesktop suite products, such as provisioning server, desktop delivery control, virtual desktop images/target devices.
- Providing extensive troubleshooting in installation and configuration of Windows Operating Systems; Disk Configuration and Installation and Configuration of DNS and Active Directory; Systems Policy and Group Policy; systems Back-up and Recovery; Windows Performance Tuning and Windows Server troubleshooting.
- Implementing Desktop GPOs
- Developing and maintaining Standard Operating Procedures for VDI Environment

Individual will be part of a multi-disciplinary team that supports JRSS. Individual must be able to integrate with other technical teams, DISA personnel, vendor technical support, and with technical representatives from DoD services. Individual will work as part of an integrated, cross-platform team to provide military base/post/camp/station migration support services DoD-wide as the JRSS stacks are deployed and used.

Qualifications:
- Experience with installing, configuring, and troubleshooting Windows Operating Systems
- Experience working in Citrix XenDesktop or VMWare view environment
- Experience with Disk Configuration and Installation and Configuration of DNS and Active Directory
- Experience with Systems Policy and Group Policy
- Experience with Systems Back-up and Recovery
- Experience with Windows Performance Tuning and Windows Server troubleshooting
- DoD 8570 IAT2 Certification

Desired Qualifications:

- VMWare ESX or other Hyper Visor experience

- Thin client using VDI Technology

- Technical written & verbal communication skills (technical writing)

- Experience with AppSense Product Suite

- Security+

- CISSP

- Experience supporting Intelligence and/or DoD Customers

- Experience Unix/Linux system administration

Education:

- Requires a Bachelor's Degree and 8+ years of prior relevant experience OR Masters with 6+ years of prior relevant expereince

E&M Technologies offers competitive salaries, medical benefits, and a 401k plan.

To Apply for this Position:

You must have the listed skills and experience in your resume to be selected for an interview. Send your resume to emtech@eandmtech.com

All qualified applicants will receive consideration for employment without regard to race, color, religion, sex, sexual orientation, gender identity, marital status, national origin, age, veteran status, disability, or any other protected class. U.S. Citizenship is required.
